Narrative: On 8/27 at 2000 a fire smoldering on the side of US Creek Road was reported by residents. On 8/28 at 1000 F-67 and F-66 went to check the fire and found .10 acres in a burned out black spruce patch. It looked to be a possible lighting strike, and fire was contained and controlled. The fire was placed in monitor status.

Name: <b>Kashunuk # 2</b>		Cause: <b>Lightning</b>	Admin: <b>YDR</b>

Narrative: At 1450 on 8/26, US FWS - YDR Observer in N720 reported the fire had grown to approximately 50 acres & was smoldering with one smoke on the south end of the fire. The fire does not pose any significant risk to adjacent resources, and has already burned into wet areas on three sides. The only flank (south) with activity is away from NCA Lands, and is likely to burn itself out of fuel as it approaches another wet area. The fire is believed to be lightning caused.

At 1500 on 8/28, US FWS - YDR Observer in N720 reported the fire was receiving light precipitation and was still smoldering on the south side with minimal gain since the fire was last flown. There is very little remaining fuel available between the fire perimeter and water. This fire has very little potential for significant growth and will most likely burn itself out or get rained out in the next few days. The fire remains in monitor status.
